## About This Game

DogFighter is a fast paced, arcade aerial combat game with arena style gameplay values. Players can compete against up to 15 opponents in 4 multiplayer modes, or go solo in 7 single player game modes, using beefed up biplanes sporting over 20 different offensive and defensive weapons...

### Key features:

- Take to the skies against up to 15 players in classic online multiplayer game modes such as Deathmatch, Team Deathmatch and Capture the flag as well as the all new **Wolf Pack** Co-Op game mode.
- Use several advanced server options to enable variations on the normal game modes by including the likes of Insta-Gib, Turbo Mode and Black Death.
- "Easy-to-fly" flight model with the controls you need to execute advanced manoeuvres such as Barrel Roll and Immelmann Turn.
- Beautifully created environments that are as much a player in the game as the people piloting the craft.
- With 8 unique craft and over 20 different weapons and defensive measures, DogFighter caters to all game play styles.
- Online leaderboards and friend tracking.

- 
- Steam Cloud supported.
  - Includes Steam Achievements.

### Updates so far:

- Joystick Support
- New Map: **The Old Gods**
- New Craft: **Mongoose**
- Added: **Tutorial Mode**
- Added Game Modes: Lone Wolf and Wolf Pack

... and that's just the start.

Since its launch, DogFighter has been updated on numerous occasions. As well as the usual bug fixes and polish we have introduced...

- Joystick Support
- Weapon and Control completely rebalanced
- A new map, new co-op game mode "Wolf Pack" and the new craft; The Mongoose.
- Configurable Xbox Controller Support

Take to the skies and deal lead death to your enemy using a state-of-the-art flight model that gives players unprecedented command of DogFighter's craft. Complete control of the craft, combined with easily executed advanced manoeuvres such as the Barrel Roll, give DogFighter players the tools they need to master the skies.

With environments built to both slay and save you, the environments in DogFighter offer the player a more interactive experience than is usual for the genre. Players can enjoy piloting their craft down mining tunnels, through pyramids and active volcanoes, in environments designed to deliver a more varied, more interactive gaming experience. Fly low, fly fast!

Not as charming as other ancient city builders such as Pharaoh or Zeus, but still a great city builder with a lot of character. They don't make them like they used to, we need more games like this.. Never was able to actually play the game. First off, i couldnt even run a background progeam while this game was running because it would caouse a connection error. Second, when shutting the game down, it didnt actually shut the game down. Instead it started 15 more instances of this game that i had to close in task manager. Thankfully the uninstall works just fine. Im not in a habbit of supporting games in full release that obviously should be in eairly access.. I have played this game twice from the cd copy one of the best star wars games. very good story about a family trying to stay neutral also i found emkay the droid to be a very funny and enjoyable character.

have only played a little of the steam version. i find that it runs very well on modern systems where the cd version i own does not even install. also the xbox360 controller works very well in all of the x-wing games that are in the package with this one. this one however you are going to need to keep a keyboard nearby because of the many shift+key combinations. this is certainly worth your time.

i would tell you about my favorite level but i really don't want to spoil the amazing story or the ending!. You only kill people... Nothing else. You might dog fight in this arcade flyer.

---

it's a really nice shooter game that you can play alone or with friends. the aiming system could be a little better and there should be more different types of weapons but it's still a good game. as german gaming youtuber i even maked a video to this game with my buddy SoulSide so you can watch how the gameplay is.

the video is allowed by the producer of this game

link to video: <https://www.youtube.com/watch?v=QFkSsEDO5XY>. I have just bought this loco and ran the first scenario twice. I love the look of the finish of this engine, the smoke and steam effects are good. Once I got the feel of the reverser, throttle and brakes I found it performed well. I cannot comment on the sounds as My PC does not have a dedicated sound card and I have problems with almost all Steam loco sounds as they overload my system. I am well on the way to a new system which MUST have a decent dedicated sound card.. bad boi game. A charming, well-made little platformer that brings back good memories. It's challenging but not frustratingly so. I loved the funny little cutscenes where the one-eyed computer screen taunts you as you progress through the maze. The artwork is cute and the game has a light-hearted feel overall.

[The game is designed for speedrunning -- it shows your total time and number of deaths at the end, along with your best time. I completed my first run in just over two hours, which sounds about right for a two dollar game. I'm not really into speedrunning but I liked it enough to play through at least one more time. Recommended.. UNIBALL..oh the glorious game uniball. My in game name was and has been ryok, i would say I started playing in the very early 2000s or late 90s? XPong? Jesus I have no idea, anyways..Uniball is all about community, dont get me wrong the game is great but the community and competitive nature is what makes you come back for more. So glad to see the game is alive and thriving, and most of all available on steam!. Short, bittersweet and totally worth of your time. It's a really nice VN to read, though it had its part of darkness.. It's good stuff. Don't let the lack of scripts deter you, the event system is pretty much as powerful as a programming language. Of course there are a few things you cannot do, but it's usually possible to creatively find a way around it. Legendary games have been crafted in this engine over the years.. how do I run this soundtrack? when i click run it just run the game](#)

[\u6709\u4ec0\u4e48\u529e\u6cd5\u53ef\u4ee5\u9009\u5177\u4f53\u54ea\u9996\u97f3\u4e50\u6765\u542c\u5417\u5982\u67e0\u6709\u4ec0\u4e48\u529e\u6cd5\u53ef\u4ee5\u9009\u5177\u4f53\u54ea\u9996\u97f3\u4e50\u6765\u542c\u5417\u5982\u67e0](#) any way to select which track to listen?. I'm enjoying this game!

[It takes some time to get used with the controls but after that is very easy to understand the basic mechanics.](#)

[Is not a normal game, is different... You must know if is a game for you.](#)

[Don't expect a lot of things happening at same time, a lot of shots or battles. Is only you walking alone in a strange world. Well, I found some surprises, like a more fast screen with a motorbike... I'm still playing. It's definitely my type of game.](#)

[If you are interested in old school 3D graphics, sci-fi synth music and a interesting slow pace story, go for it. :\)](#)

[. Game is♥♥♥♥ The only reason i have 11 hours in this stupid game was because i played it when i was 13 years old when i wasnt allowed to play minecraft and i was bored and had nothing better to do because i was stupid.](#)
